

## SL67S & SL69S – Jump Starter Power Packs Lithium

Sealey's new Lithium Jump Starter Power Packs are powered by lithium-ion technology and fully protected against reverse charging and overload. Easily fits in a glove box or backpack and benefit from being a compact, lightweight unit which provides high amperage output.

The SL67S is capable of starting 12V vehicles up to an 8 cylinder engine and the SL69S is capable of starting 12V vehicles up to a 10 cylinder engine. Li-ion batteries have numerous advantages over lead acid, including a flat discharge curve. This ensures a greater and extended performance and holds the charge for up to 5 times longer with high energy density levels giving more battery power per gram.

They both include an integral work light for use at night. The SL67S is fitted with a 10,000mAh battery, the SL69S is fitted with at 15,000Ah battery, and both models incorporate two USB outlets (5V/2.4A and QC 3.0). These units can also supply several full charges for smartphones and MP3 players or one full charge for your tablet/laptop.
