

VSCAN - V-Scan Multi-Manufacturer Diagnostic Tool – Android

Sealey's NEW V-Scan multi-manufacturer diagnostic tool is a wireless Android based system which enables near OE-level diagnostics. It is an extremely well priced midrange tool, which allows you to use a mobile phone or tablet to diagnose cars, SUVs and vans. Connect to the vehicle using a standard 16pin EOBd connector and this model includes an extension cable for hard to access diagnostic sockets. Can be used in conjunction with a compatible Android device (2.3 and later). All the software is supplied, downloaded and stored on the mobile phone or tablet. This unit is supplied with one year of updates and doesn't lockout when updates have expired.

- Software features:
- Read/Clear codes
- Live data
- Actuation tests
- Special functions; Battery Configuration, DPF, Electronic Parking Brake, Injector Programming, Key Programming, Odometer Adjustment, Oil Service Reset, Steering Angle, Throttle Reset and TPMS.
